

First participation of LUCEO in the INTERPACK exhibition

On a stand of 86 m², LUCEO will present its inspection machines dedicated to food and beverage industry.

Vern-Sur-Seiche, on February 22nd, 2008 – LUCEO machines allow to eliminate the risk of marketing not conform food products. According to whether they are beverage (beer, soda, mineral water...) for the Focus and LabelEye, meat products, delicatessens or dairy products for the ThermoSecure range, LUCEO machines detect defective packing and foreign particles in full bottles or sealing of tray packs.

Thanks to these quality inspection tools, industrialists highly improve their brand image with the decrease of faulty product returns or guarantee the total food security. Beyond final market expectations, LUCEO machines improve the process of industrialists by increasing production rates and eliminating repetitive manual operations.

Thanks to its extensive presence on the international scene and its renowned global customer service, LUCEO is positioned as innovative partner. Moreover, the last innovations such as the remote maintenance and the flexibility of the equipment will be presented at INTERPACK.
